

Commercial Advisory

RISC has been providing independent commercial, market and regulatory advice to clients in the oil and gas industry for over 20 years. We have a reputation as a trusted advisor, creating workable solutions to complex commercial issues.

RISC assists clients with corporate and strategic plans to help grow the value and performance of their petroleum assets. With a depth of understanding across the entire oil and gas lifecycle, we work together with companies to challenge and discuss issues and formulate outcomes that work for them.

Being able to offer impartial and knowledgeable advice across strategic, transactional and operational levels in conventional and unconventional assets gives our clients a competitive advantage and allows them to make *decisions with confidence*.

The distinguishing characteristic of RISC staff is that they have worked for operators and venture partners for much of their careers in senior technical and commercial capacities.

As a result, our advice and opinions transcend the technical/commercial bridge, providing clients with a broad insight into the opportunities or operational challenges which they confront.

RISC offers a unique and holistic perspective to commercial advisory assignments

Strategy and corporate planning – strategic, commercial and economic evaluation advice; competitor analysis; development of asset business plans

Petroleum economics – project economic evaluations; quality assurance and peer review; portfolio reviews; economic model building

Commercial valuations – asset acquisition or take-over defence valuations; exploration asset portfolio valuations

Gas market evaluation – reviews of gas supply pricing, contracting advice, economic evaluations, technical and commercial risk assessments
