

Independent Opinion

At RISC we understand that the quality of independent advice is a function of both in-depth knowledge of the subject matter and the ability to communicate opinion effectively to stakeholders. Our experts have years of oil and gas industry insight and our reputation as a world class independent advisor ensures stakeholders make key *decisions with confidence*.

RISC has been providing comprehensive and independent advice to listed companies (ASX, SGX, TSE, LSE and others), banks, financiers, private equity and government agencies for over 20 years. We have provided expert witness advice on gas price redetermination and valuations; we have a wealth of experience in reserves certification, Competent Persons Reports and reserves reporting; and we can provide independent expert advice on listings and takeovers. We understand the needs and concerns of the client and provide impartial high-quality reliance reports which are comprehensive but clearly communicated, within prescribed deadlines and, where necessary, ready for publication.

Our experts have decades of industry experience and the communication skills to deliver technical arguments to non-technical readers.

Our success in “translating” technical reports for bank credit risk committees and sustaining arguments in the witness box are testimony to these communication skills.

RISC has completed 2,000+ assignments in over 70 countries for more than 500 clients
