

Technical Advisory

RISC is an industry leader in providing technical advisory services to the oil and gas industry. Our multi-disciplinary approach provides our clients with a truly global, integrated and innovative service across the entire asset lifecycle.

Our project teams can offer a full range of services to our clients. Our strength is in the sub-surface and our skills can be applied towards multi-disciplinary projects or specific, discipline-based scopes. We are able to work independently or as part of an integrated team, located within our own offices or with the client.

We are flexible in our approach to provide a solution for our clients, enabling them to make technical and commercial *decisions with confidence.*

We have been completing complex assignments in most areas of the world for major, mid-tier and junior players for over 20 years.

- Basin evaluations
