

Western Australia Domestic Gas Market Overview

RISC is producing a unique and holistic perspective report on the Western Australian Domestic Gas Market. The report will contain independent and impartial views on the domestic gas market and will prove invaluable for all parties interested in the future of the domestic gas market in Western Australia.

RISC have been providing independent commercial, market and regulatory advice to clients in the oil and gas industry for over 20 years and has a reputation as a trusted advisor, creating workable solutions to complex commercial issues.

We give our clients a competitive advantage and allow them to make *decisions with confidence*.

The report will include:

History and current status of the WA Domestic Gas Market

- An overview of existing market and infrastructure, including the Domgas Reservation Policy
- Views on the current Supply/Demand balance
- The influence of the international LNG Market

Demand Analysis

- An independent review and analysis of current demand forecasts
- The impact of the DRP, renewable energy and emissions targets etc.

Supply Analysis

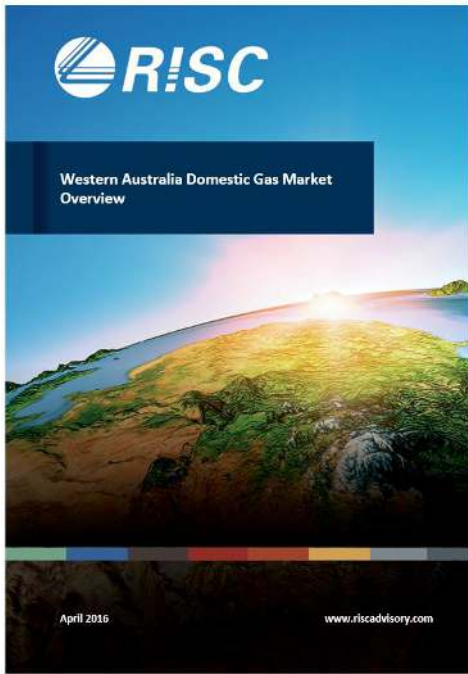

- RISC's view on existing and potential future supplies,
- Influences, drivers and requirements for different suppliers (including breakeven cost of supply analysis)

Conclusions

- A range of views on future Supply/Demand balance and what that might entail for prices and negotiations

The report will be available end April 2016 at a cost of A\$10,000.
